

## Energy Saving Questionnaire

In March 2014 a questionnaire was distributed to the parents of the children in third to sixth class.

22 surveys were returned.

Some of the results obtained were as follows.

In relation to the length of time spent in the shower;

**59%** of those surveyed shower for *less than ten minutes*.

**0%** shower for *less than three minutes!*

**27%** shower for *less than five minutes*.

**14%** shower for *more than ten minutes*.

All of the houses surveyed had insulation, low voltage lamps and the hot water cylinder insulated.

In addition **14%** of houses surveyed had *solar panels*.

In response to the question " Do you fill the kettle to make one cup of tea?"

**64%** replied No.

**36%** replied Yes
